

# Restaurant Website – Final Requirements Document

## 1. Project Overview

We will design and develop a **modern, responsive restaurant website** that reflects a **traditional, pure vegetarian dining experience** with a warm, earthy aesthetic inspired by clay cookware, natural textures, and authentic Indian hospitality.

The website is intended for:

- Brand presence
- Menu showcase
- Customer engagement
- Review collection
- Enquiry submission

**⚠️This is an informational website, not an online ordering or payment platform.**

## 2. Design Theme & Experience

### Visual Style

- Traditional & earthy color palette (terracotta, beige, brown tones)
- Clay pot, wooden table, handcrafted visual inspiration
- Clean, modern layout with subtle animations
- Mobile-first responsive design

### Animations

- Smooth scroll-based animations
- Fade-in and slide-up effects for sections
- Hover effects on buttons and cards
- **✗**No heavy or distracting animations

## 3. Pages & Features

### 3.1 Home Page

The home page will introduce the restaurant and its identity.

Includes:

- Hero section with restaurant name & tagline
- Brief introduction about the restaurant
- Highlight of signature dishes
- Why-choose-us section (Pure Veg, Traditional Cooking, Hygiene, Quality)
- Customer review preview
- Footer with contact details & social links

### **3.2 Menu Page**

Displays the complete food menu in a structured and readable format.

Features:

- Menu categories (Starters, Main Course, Rice Items, Desserts)
- Item name, short description, and price
- “Add to Cart” option for customer selection (non-ordering)

### **3.3 Cart (Food Selection Cart)**

A simple cart feature for customer convenience.

Purpose:

- Allows customers to select items they are interested in
- Used only for enquiry, not for placing orders

Features:

- Add/remove items
- Quantity increase/decrease
- Display of subtotal and total amount
- “Proceed” button to send selection as enquiry

⚠No payment, checkout, or order confirmation included.

### **3.4 Reviews & Testimonials**

Displays customer feedback to build trust.

Features:

- List of customer reviews
- Name, comment, and rating
- Option for visitors to submit a review
- Average rating display

### **3.5 Rating System**

- 5-star rating system
- Automatically calculates average rating
- Displays total number of reviews

### **3.6 About Us Page**

Tells the story of the restaurant.

Includes:

- Restaurant background
- Philosophy and values
- Cooking style and traditions

- Supporting images aligned with theme

### 3.7 Contact Us Page

Allows visitors to reach out to the restaurant.

Features:

- Contact form (Name, Email, Message)
- Address and phone number
- Embedded Google Map
- On submission, user is redirected to Thank You page

### 3.8 Thank You Page

Displayed after:

- Submitting contact enquiry
- Submitting review
- Sending cart enquiry

Includes:

- Confirmation message
- Navigation back to home page

## 4. Functional Scope (What Is Included)

Responsive design (mobile, tablet, desktop)

Menu display with categories

Review & rating system

Food selection cart (enquiry-based)

Contact & enquiry form

Smooth animations & modern UI

## 5. Limitations (Very Important)

To maintain project clarity and timeline, the following are **NOT included**:

- ✗ Online ordering
- ✗ Payment gateway
- ✗ Delivery tracking
- ✗ User login or registration
- ✗ Admin dashboard UI
- ✗ Offers, coupons, or discounts

These can be discussed as **future enhancements** if required.

## 6. Technical Overview (High-Level)

- Frontend: Modern web interface (React-based)
- Backend: Secure server-side API (Django)
- Database: PostgreSQL for storing menu, reviews, and enquiries

- Hosting & domain: To be finalized separately

*(Technical implementation will be handled internally; no technical involvement required from client.)*

## 7. Project Deliverables

- Fully functional restaurant website
- Responsive across devices
- Clean, modern UI aligned with restaurant theme
- Source code & deployment-ready build
- Basic documentation for future reference

## 8. Approval & Change Policy

- This document defines the **final scope**
- Any new feature requests beyond this will be treated as **additional work**
- Timeline and cost adjustments may apply for extra features

## 9. Summary

This website will:

- Present the restaurant professionally
- Build trust with customers
- Showcase menu and food culture
- Collect reviews and enquiries
- Maintain simplicity and performance
